Verifying Trigonometric Identities with Simple Arguments Involving the Product of Three Trigonometric Functions: Problems with Solutions
(Part 23)

93. $\cos\theta \cdot \cot\theta \cdot \sec\theta = \cot\theta \cdot \cot\theta \cdot \tan\theta$.

94. $\sin\theta \cdot \csc\theta \cdot \cot\theta = \cot\theta \cdot \cot\theta \cdot \tan\theta$.

95. $\sin\theta \cdot \sin\theta \cdot \cot\theta = \cos\theta \cdot \cos\theta \cdot \tan\theta$.

96. $\sin\theta \cdot \sec\theta \cdot \cot\theta = \cos\theta \cdot \csc\theta \cdot \tan\theta$.
